KDOT plans winter road work in Montgomery County

Kansas Department of Transportation (KDOT) maintenance crews plan to make concrete repairs on sections of U.S. 400 in Montgomery County during December and January, weather permitting. The road work begins at the Wilson-Montgomery county line and continues east. Flaggers and a pilot car will direct traffic through the work zones, with weekday delays of 10 minutes or less expected.

KDOT crews will also place asphalt seals on U.S. 169 bridge expansion devices when the weather permits. The bridge repairs start on the four-lane section east of Coffeyville and continue north through Montgomery County. A pilot car operation will control traffic on weekdays, with three-to five-minute delays.

For more information contact KDOT Superintendent Marcus Leck at (620) 577-7313 or Public Affairs Manager Priscilla Petersen at (620) 902-6433.
