KDOT to begin field survey for bridge replacement over I-35

Starting Monday, June 24 and continuing for three weeks, weather permitting, the Kansas Department of Transportation (KDOT) will conduct a field survey at the bridge over I-35 on Montana Road in Franklin County. The bridge is located 1.3 miles northeast of the I-35/U.S.59 junction.

The survey is taking place to gather information necessary for a detailed design of the proposed project to replace the bridge. The survey is based on the existing alignment of the bridge. Surveyors will obtain information 500 feet north and south of the existing bridge along Montana Road.

Activities will include the use of survey instruments on the ground to determine locations of existing features within the corridor. A member of the survey crew will first contact property owners and/or tenants for permission to enter private property. William Haverkamp, L.S., will be in charge of this survey for KDOT.

The bridge replacement project has not been funded for construction. For more information contact Southeast District Public Affairs Manager Priscilla Petersen at 1-877-550-5368 (toll free).
