Field survey to begin on U.S. 75 south from Caney

Around Tuesday, June 5, and continuing for approximately six weeks, a survey team from the Kansas Department of Transportation (KDOT) will conduct a field survey along the U.S. 75 corridor from the Oklahoma-Kansas state line, north, to the south city limits of Caney.

The survey is being made to support the design for the 4-lane expansion project of the U.S. 75 corridor. Surveyors will gather information necessary for the detailed design of the proposed improvement. Activities will include the use of survey instruments on the ground to determine locations of existing features within the corridor.

A survey crew member will first contact property owners and/or tenants for permission to enter private property. Rob Selley, L.S., Party Chief, is in charge of the survey for KDOT.

KDOT is conducting preliminary engineering activities, including the field survey on this project. Construction on the \$5.8 million project is tentatively scheduled to start in 2016. For more information about the project and the T-WORKS transportation program visit the website, www.ksdot.org/tworks.
