Website will allow Kansans to track progress of transportation projects

Kansans will be able to view scheduled transportation work in their area thanks to a new website, www.ksdot.org/tworks launched by the Kansas Department of Transportation (KDOT).

The [T-WORKS](http://www.ksdot.org/tworks) website displays all highway, transit, rail, and aviation work that is scheduled under the state's transportation program, T-WORKS. This site will enable Kansans to see how much money has been invested in their county, when projects are scheduled to be completed, maps of the projects and the latest news in Kansas transportation. It also allows users to create customizable project lists and maps based on their interests.

"The T-WORKS website makes our agency more transparent to citizens than ever before," KDOT Secretary Deb Miller said. "This site allows Kansans to see if a project is on-schedule, holding us accountable for delivering projects on time."

Since T-WORKS is a 10-year program and not all projects have been selected, the site will be updated continuously with any new projects. It will also provide timely updates on existing projects as they develop. It's important to note that the road projects listed on the site are either on the state highway system or KDOT plays a role in administering them. Information about most city street and county road projects will not be available on this site.

Another key feature of the T-WORKS site is that it allows for Kansans to provide comments or ask questions regarding any project or issue.

“Thousands of Kansans provided input that was essential for the development of T-WORKS,” Secretary Miller said. “Our goal with this site is to keep them informed of our progress and provide them the opportunity to give us input on how the program is being delivered. Together, we can make sure Kansans are getting the most out of their investments.”
